

ANDREW BAKAREKE

SOFTWARE DEVELOPER

Kigali, Rwanda | +250 789 490 560 | bakarekeandrew@gmail.com | github.com/bakarekeandrew |
linkedin.com/in/bakareke-andrew

PROFILE

Full-stack developer with hands-on experience building web and mobile applications using React, React Native, Flutter, Spring Boot, Node.js, and PostgreSQL. Skilled in designing REST APIs, implementing authentication and authorization, and delivering scalable, secure full-stack solutions. Passionate about software engineering, problem-solving, and mentoring other developers.

SKILLS

Languages: Java, JavaScript, TypeScript, Python, C, C#, Dart

Frontend: React, React Native, Flutter, Tailwind CSS

Backend: Spring Boot, Node.js, NestJS, FastAPI, REST APIs, JWT, RBAC, ETL Concepts

Databases: PostgreSQL, MySQL, MongoDB

Tools & DevOps: Git, GitHub, Docker, AWS, Postman, Linux

Languages Spoken: English, Kinyarwanda

PROFESSIONAL EXPERIENCE

Web Development Trainer — The GYM Preparatory Training

Apr 2025 – Sept 2025

- Delivered training on modern web development technologies to a cohort of aspiring developers.
- Guided students through full-stack application development from planning to deployment.
- Mentored students in React, Spring Boot, and relational database concepts.
- Assisted students with debugging and hands-on project implementation.

Full-Stack Development Trainee — The GYM Software Training

Nov 2024 – Nov 2025

- Took part in an intensive full-stack development program strengthening frontend, backend, and project collaboration skills.

AI & Innovation Contributor — AUCA Innovation Center

Feb 2025 – Oct 2025

- Participated in AI-focused, hands-on learning projects.
- Collaborated on problem-solving projects addressing real-world challenges.

Mobile Application Development Trainee — Talent4StartUps, ICT Chamber

May 2024 – June 2024

- Strengthened backend fundamentals and server-side logic for mobile applications.
- Built and integrated APIs in team-based projects.

PROJECTS

SafeReport *React · Spring Boot · PostgreSQL*

- Developed REST APIs using Spring Boot and PostgreSQL.
- Designed database schemas and optimized SQL queries.
- Implemented JWT authentication and role-based access control.
- Integrated backend services with frontend applications, managing data storage and retrieval workflows.

SafeReport Mobile *Flutter · REST APIs*

- Built a cross-platform mobile client with Flutter, consuming REST APIs for real-time reporting and updates.
- Designed multi-screen navigation and state management for a smooth citizen-facing user experience.
- Integrated authentication and role-based views to match backend RBAC permissions.

Automated Data Integration & ETL Platform *Python · FastAPI · PostgreSQL · Docker*

- Built automated ETL pipelines to collect, transform, validate, and load data from REST APIs into PostgreSQL.
- Developed FastAPI backend services to manage data synchronization and integration workflows.
- Implemented data quality checks, duplicate detection, and validation rules for reliable datasets.
- Optimized SQL queries and database performance for efficient data processing.
- Automated scheduled synchronization jobs with logging, monitoring, and retry mechanisms.
- Containerized the application with Docker and deployed services in a Linux environment.

Car Sharing Application *React · NestJS · MongoDB*

- Built a full-stack car-sharing platform with APIs for bookings, vehicle listings, and user management.
- Designed backend services for processing and managing application data.
- Integrated authentication and authorization mechanisms, working with PostgreSQL and MongoDB.
- Collaborated using Git and Agile development practices.

Disaster Management System *React · Spring Boot · PostgreSQL*

- Developed a disaster reporting and response management platform.
- Implemented role-based access for citizens, coordinators, and administrators.
- Designed REST APIs with Spring Boot and built responsive interfaces with React.
- Designed PostgreSQL database schemas and relationships; collaborated using Git and Agile practices.

EDUCATION

Bachelor of Science in Information Technology

Adventist University of Central Africa (AUCA) — Sept 2022 – Nov 2026

Secondary School Diploma

Byimana School of Science (BSS) — Jan 2018 – Aug 2021

CERTIFICATES

- The GYM Certificate
- AUCA Innovation Center Certificate
- Mobile Developer Certificate
